## IN THIS ARTICLE

A Jacksonville construction services company is entering the residential homebuilding market.

The W.G. Pitts Co., which for 10 years has been designing and building amenities such as clubhouses for residential communities, has formed a residential division called Haven Homes.

The new division will begin working as a preferred builder in the Oyster Bay Harbour development in Fernandina Beach.

W.G. Pitts will add homebuilding to its general contracting, design build and construction management services. Haven Homes controls eight sites in the Oyster Bay development and has options on more.

The initial residential projects for Haven Homes will be in communities where W.G. Pitts has already done work.
